

Resend Invitation API

Feature

This API is used to resend the signing invitation when the initial invitation was not sent.

HTTP Method

POST

Headers

| Header Name | Description |
|------------------------|------------------------|
| x-parse-rest-api-key | Required API key |
| x-parse-application-id | Application identifier |

Request Body

```
{
  "document_id": "xxxx",
  "docket_id": "xxxx",
  "stakeholder_id": "xxxx",
  "reference_id": "xxxx"
  "attempt_count": "xxxx"
}
```

Response

With Invitation Link

```
{
  "status": "xxxx",
  "error_code": "xxxx",
  "message": "xxxx",
  "reference_id": "xxxx",
  "resendInvitationLink": "xxxx"
}
```

Without Invitation Link

```
{
  "status": "xxxx",
}
```

```
"error_code": "xxxx",
"message": "xxxx",
"reference_id": "xxxx"
}
```

Content-Type

JSON in Base64 encoded format.

Request Parameters

| Parameter Name | Field Option | Description |
|----------------|--------------|---|
| stakeholder_id | Mandatory | Unique ID assigned to every stakeholder. |
| reference_id | Mandatory | Unique ID assigned to every eSign requester for each API call. |
| docket_id | Mandatory | Unique ID for the set of uploaded document(s). One docket_id is assigned per set. |
| document_id | Mandatory | Unique ID assigned to each uploaded document. |

Response Parameters

| Parameter Name | Description |
|----------------------|---|
| status | Indicates success or failure of the API. |
| message | Status message of the invitation. |
| reference_id | Unique ID assigned to every eSign requester for each API call. |
| resendInvitationLink | Invitation link sent to signers who did not receive the initial invitation. |
| error | Error message associated with the failure. |
| error_code | Code corresponding to the error. |
